

## Live Webinar - Collision

**Duration:** 90 minutes

**Method:** Zoom

**Maximum 15 delegates**

This webinar helps delegates to gain insights into the principles of collision law, insurance coverage, and practical claim handling. By exploring real-world scenarios and key legal concepts, delegates will enhance their ability to manage collision-related challenges effectively.

### Objectives

By the end of this session you will be able to:

- Identify what a vessel might make contact with
- Explain the principles of the Collision Convention and the Collision Regulations
- Describe how shipowners can choose to insure contact related risks
- Explain key terms such as contact, allision and fixed and floating objects
- Explain how a typical contact related claim can be handled including the interaction between hull & machinery and P & I.

### Course Contents

- What might a vessel crash into?
  - Fixed objects
  - Floating objects
